#### Farmers Now Reckon Mr. Pig Their Most Profitable Product and Scorn the Price of Corn-Hogs Never So High and Likely to Be Higher Yet.

LINCOLN, Neb., Nov. 10.-Another ratio once held sacred in the middle West has gone to join in the limbo of the dead the belief that 16 to I was just right as between silver and gold and also that the price of wheat was indissolubly linked with that of silver. The third one to depart was the 10 to I ratio between the price of hogs and the price of corn.

For a good many years it was figured that in order to come out even the man who fattened hogs for market must get s cents a pound when corn was selling at 50 cents, 6 cents when corn was 60. and so on. Experiment has demonstrated that with corn at 50 cents and a big lot of alfalfa ready at hand to be judiciously fed the growing porkers a pound of pork will cost about 31/2 cents.

In view of the fact that hogs are just now bringing \$7.25 and \$7.35 at the home market and have been both higher and lower within a dollar range for more than a year some light may be thrown city to the farm in contradistinction to the exodus of the farmers' children from the farm to the city.

As a machine for converting raw material into quick money and big money there is nothing that beats the hog. One of the big industries in the alfalfa belt the feeding of porkers for market. There are many big ranches where alfalfa and corn are raised especially the purpose of transforming them into pork. There are other places where nothing is attempted save feeding. The feeder borrows a lump sum from his bank, goes into some hog raising district, buys his herd and ships them to the home ranch, where he devotes his entire attention to the feeding process. After he markets them he pays off the bank and pockets a big surplus at ruling market

experts say thay are going higher. The gap between supply and demand is steadily widening, and cheap pork will be only a dream for years to come, until the high prices and the big profits conduce to plunging and overproduction. That, however, is a long way off, inasmuch as there are other branches of agriculture that are paying as well and will soon pay

There never has been a time in the history of the pork raising industry when prices have been so uniformly high for so long. On November 6, 1903, hogs were selling at the Nebraska markets at \$4.73 a hundred pounds. A year later the price was \$4.89; in November, 1905, \$4.87; in November, 1905, \$4.87; in November, 1905, \$5.80; in November, 1905, \$5.80. November, 1906, \$5.96; in November 1907, \$5.15; in November, 1908, \$5.79, and

on November 6, 1809, \$7.70.

The average hog ready for market weighs about two hundred and twenty-five pounds. At \$7.40 a hundred this means nearly \$16 for each animal. Most of these are raised as a side line on farms and on ranches following cattle, where they are almost a clear profit, but on the hog ranches as high as 5,000 are marketed a year, but half that number is nearer the average. Some hogs go as high as \$30. Selling an animal for \$16 that cost to raise only about \$8 or \$9 is a very profit-able business, especially if one can market 2,000 hogs a year. Some of the big packing concerns are engaged in hog raising

shipments.

Much of the new money in hogs comes from affalfa. Tests showing the feeding values prove that alfalfa is worth 45 per cent. more than clover, 60 per cent. more than timothy, and one acre of it will pasture thirty hogs for six months.

The United States is the largest producer hogs in the world. Americans are of hogs in the world. Americans are essentially a pork eating people. About 40 per cent. of the world's hogs are marketed in this country, and more pork is produced here than in Russia, Germany and Austria combined. Early maturity has had a great deal to do with increase in pork eating. The packers are calling all the time for young hogs to slaughter just as they want bed cattle that mature early. The eighteen-months-old hog, once the staple of the market, is being pushed out by the six months feeder, and farmers were quick to see that it was poor business

out by the six months feeder, and farmers were quick to see that it was poor business to feed a hog for the longer period when he got a better price, pound for pound, for those fed from four to six months.

Public taste, or rather the change in it is back of it all. People want younger, lighter and leaner meats. A shortage in the older grades forced young hogs outo the market some ten years ago, and after the meat eaters got a taste of the leaner stuff they refused to go back to the old. Buyers are now discriminating against the heavier and over-finished animals.

A surplus of fat, whether it be lard

finished animals.

A surplus of fat, whether it be lard or tallow, is at a discount. Trim, neat, carcasses find the readier sale at top prices, while the heavier ones must be cut in price to have them move. The farmer is the chief gainer, because the guncker he gets his hogs to market the less it costs him. At the fat stock shows so numerous in the West the fat hogs are often not allowed to compete at all, or if let in are marked down as not meeting proper conditions.

The big prices hogs are bringing has beinght about a betterment in his environ-

ought about a betterment in his environ-ents that would delight Mr. Roosevelt, case expression of solicitude for farm whose expression of solicitude for farm conditions was once very forceful. Hogs set clean sleeping places every night, their pastures are carefully selected in respect to shade and the nearness of running water in order that they may not he exposed to the hot sun and have drinking water where they need not walk their legs off to reach it. In feeding pens one often finds a system of pipes that carry the water and liquid food from a central place of deposit in quantities sufficient to nourish and so distribute it that there is no overfeeding. Some of the more no overfeeding. Some of the more odern hog pens are provided with a tented trough that does not permit e pig to be so ill mannered as to put seet into the trough at any time.

## TWO HEADS

Two heads are better than one not always, but sometimes. When one head is better than an aggregation of heads, it is called genius.

We are digressing somewhat, but we want to anticipate a possible criticism. We'don't want a wrong con-

struction put on our talks on improving real estate. As a matter of fact, property owners are calculated to know

more about their property and its possibilities than we do. In any event, we are not pre-

suming to give them advice. All that we aim to accomplish is: To stimulate those owners who may be delaying their building operations.

And, occasionally, perhaps, to help some owners to finance their building operations along the most conservative lines.

Father McLoughlin's Gift to the Pone. Archbishop Farley, accompanied by his secretary, Mgr. James V. Lewis, went to Fort Slocum yesterday morning and presided at the dedication of St. Sebastian's chapel. The chapel is a gift of the Rev. Thomas McLoughlin, rector of Blessed Sacrament Church in New Rochelle. Father McLoughlin recently celebrated the silver jubilee of his ordination and a purse of 33,500 was presented to him by his parishioners and friends. He used the money to build the Fort

Slocum chapel.

Mgr. Patrick J. Hayes, chancellor of the diocese, preached the sermon. Companies from Forts Schuyler and Slocum escorted the clergy and with the church societies in

At the end of the services Archbishop Farley addressed the congregation, saying that he had recently returned from a visit to the Pope, who had authorized him to bestow the Papal blessing, which was to include the blessing on the soldiers. He also thanked Father McLoughlin for his hard work in bringing about the exection of the charel.

Civic Association Rejects the Commission Plan-City Charter to Be Asked For.

MONTCLAIR, N. J., Nov. 14 .- The 'aw committee of the Montclair Civic Association at a meeting last night decided to abandon the proposed plan to conduc the affairs of Montclair by a commission of three men. Instead it was decided to recommend the adoption of a charter for city government.

Montclair has now a town government but because of the size of the community this system has become unsatisfactory. The Civic Association some time ago took up the question of a new form of government, and many were in favor of the commission plan. John B. Wight, president of the association, was formerly a member of the commission which rules the affairs of Washington, D. C.

SPLIT OVER TEMPERANCE IS. SUE SAID TO BE NEAR

Anti-Saloon Agitation of Some Leaders Offensive to Majority. Who Would Limit Work to True Labor Questions

-Clergyman Accused - Deflant Talk. TORONTO, Nov. 14.-There is a big split in the American Federation of Labor. Some of the prominent members, believe it is on the eve of a smashup similar

to that of the Knights of Labor. Several members have prophesied that if influences within the Federation continue to agitate certain ideas outside its sphere of operations and opposed to the views of a majority there will be nothing to do but disband. This feeling has been intensified by the fact that some members are endeavoring to make it appear that the presence on the platform of Massey Hall at a temperance mass meeting this afternoon of prominent members who gave their personal views regarding emperance in the United States is endorsed by the federation.

For instance, the Rev. Charles Stelales said the time had come when labor and the saloon must be absolutely divorced.

"I do not make this statement as a man," he added, "but officially for the Federation of Labor." He then went on

Federation of Labor." He then went on to quote from certain of President Gompers's addresses of the past year to show that labor feit that way.

John B. Lennon, who took pains to say he spoke not as the federation's treasurer, but as an individual, said he had been criticised for condemning the ssloon. "I give these critics notice right now and here." he thundered. "that I will continue to fight the saloon as long as it fights the

"I give these critics notice right now and here." he thundered. "that I will continuate to fight the saloon as long as it fights the citizens!" He said that organized labor's greatest enemy to-day was the saloon.

John Mitchell said he had heard of the threatened split in the federation on the saloon question, but he thought the federation too big for that. He declared that every scandal there has been in labor could be traced to the saloon. The time was at hand when every great labor leader would be an anti-saloon man.

T. L. Iewis said he did not care for critics who would have him keep quiet on the saloon question. He knew the mine workers were against the saloon, and one of the clauses of their constitution forbids any member to sell intoxicantal even at a picnice. even at a picnic?

even at a picnics.

It is understood that the federation, as a whole does not inderse the views of these mon, nor does it inderse any movement except a movement that has for its aim and ultimate object the increase of the standard of wages and in the means of living of the vast army of laborars. At present some of the members think they see in the Rev. Mr. Stelzle a force representing the Anti-Saloon Association of the United States and endeavoring to
